

EDITORIAL COMMENT

The second class in the officers' training camps will finish this week.

Mayor Geo. W. Smith, Louisville's new executive, takes office today, and the city goes under Republican administration for four years.

Gen. Bennett H. Young argued the Lube Martin murder appeal from Murray Friday, speaking for the defendant.

Ludlow F. Petty, named as a member of the Board of Public Safety in Louisville, has since been made Chief of Police instead and M. H. Thacker has been appointed on the Board of Public Safety.

A Democratic primary will be held in Nashville Thursday. Attorney General A. B. Anderson, a son-in-law of Mr. Geo. E. Gary, of this city, is a candidate for renomination, with three opponents. The term is for 8 years.

Villa is now making Ojinaga his headquarters and has issued a bombastic proclamation praising himself for his humanity and asking Caranza soldiers to join his side and help bring about peace. He has turned out a full beard and has entirely recovered from his wounds.

The Democrats made a boneheaded play in the Daviess-McLean senatorial district that offsets the loss to the Republicans in the Christian-Hopkins district by the ineligibility of F. L. Hamby. Senator-elect R. L. McFarland is school superintendent of Daviess county and failed to resign in time.

The Russian situation is confused by many conflicting rumors. The defeat of Kerensky in Petrograd Saturday was reported, the Premier escaping in disguise, while the Lenine faction slaughtered cadets and women soldiers. Yesterday reports came that Kerensky was with a new army approaching Petrograd and that Grand Duke Michael was with him. The Lenine faction are quarreling among themselves while it is said Kerensky has lost all of his influence and popularity with the workmen.

The sale of Red Cross Christmas Seals will soon be instituted, and it's almost useless to impress upon the people the importance of co-operating with the different committees in the disposition of the seals. A matter that carries with it so much force, simply needs to be mentioned to the public to secure their hearty support—hence we will not enter at all exhaustively into the discussion, suffice it to say, the seals will be sold under the auspices of C. C. H. and Welfare League, 25 per cent. of the profits being sent to the Red Cross Tuberculosis Commission to be used in a war against tuberculosis in the State at large, the other 75 per cent. being retained by the leagues for health work here. Every one will be given an opportunity to contribute to this cause. The merchants will be called upon as well as the public at large, sales being organized at stores, public places, etc. Red Cross posters will show you stations for sales. In contributing to this cause you are helping to win war, for tuberculosis is one of our enemies as well as the Kaiser.

DR. RANDOLPH DADE, Chr.

Barker-Huggins.

Claude Barker, of Middletown, O., and Miss Bessie Huggins, youngest daughter of Mrs. R. H. Huggins, of this city, were married last night. The couple left at once for Middletown where the groom holds a government position. Owing to a recent bereavement in the family, the marriage was a very quiet affair.

JAFFA FALLS TO BRITISH

Turks Driven Out of the Seaport of Palestine Saturday.

HEN ON IN FLANDERS

British Chase German Sea Craft Into Their Haven of Safety.

Again the artillery duel on the Flanders front has reached tremendous proportions and it is not unlikely that Field Marshal Haig has in preparation another dash forward from the region of Passchendaele toward the town of Roulers and the important railway line serving the German front from the North sea southward.

The Germans, anticipating another of the irresistible operations of the British commander-in-chief, are directing their heavy gun fire on the position in the neighborhood of Passchendaele and Langemarch and south of the Polygon wood.

To the south the big guns of the French and the Germans also are active along the Chemin Des Dames and the present week doubtless will witness another attempt by General Petain's army here to press further forward toward Laon.

The British troops in Palestine are giving the Turks no rest. The important city of Jaffa on the Mediterranean has been captured by them, the Ottoman forces offering no resistance. It is stated that instead of standing and offering battle, the Turks are in retirement northward.

The German naval forces encountered by British light war craft in the North sea Saturday were forced to seek a haven of safety under the protection of their battle fleets and behind mine fields of Helgoland. The British warships chased the fleeing enemy as far as was compatible with safety and when last seen one of the Germans was on fire and another apparently had been damaged by the marksmanship of the pursuers. In addition a German minesweeper was sunk. The British naval unit suffered slight material damage and there were few casualties among the crews.

VICTIM OF HEART DISEASE

Young Lady Passes Away After an Illness of Several Months.

Miss Zettie Waters, aged 15 years, daughter of Mr. H. P. Waters, who resides in the eastern part of the county, near the Todd county line, died Sunday. Death was due to heart disease, from which she had been a sufferer for some time. The interment took place yesterday in the Ebenezer church burying ground.

TO NAVY YARDS.

J. L. Harpole, of Hopkinsville for Norfolk, Va.

Mr. J. L. Harpole, the expert machinist, will leave tomorrow for Norfolk, Va., where he will accept a position as machinist in the Navy Yards. Mr. Harpole has lived here many years and his place will be hard to fill, since he has been the only man in the city who could do certain kinds of work. His family will shortly follow him and he goes to take a permanent place with the government.

Pound Potatoes.

Mr. J. A. Shaw, of near Fairview, brought to this office some samples of his Irish potato crop weighing one pound each. They were of the Early Rose variety and his crop was fine in quantity and quality.

Y. M. C. A. Has "Good Things" For National Army Men In Camp Libraries

"Good things" for the soldiers do not consist entirely of food delicacies or smokes, in spite of the popular belief. On the contrary good books come in the category. Reading as a pastime is becoming more and more popular with the soldiers of the National Army, a group of whom are shown here in the library of the Y. M. C. A., at one of the great cantonments "somewhere in the United States." These libraries are filled with "good things" in the form of books and periodicals and newspapers from many parts of the country, and the soldiers have full access to them.

Y. M. C. A. FUND STILL SHORT

Hard Work Will Be Needed to Secure Even the Minimum.

BIG DRIVE YESTERDAY

Committees Trying Hard to Reach Total of \$5,450.

The Y. M. C. A. war work fund of \$5,450 for Christian county was not all raised yesterday, but under the lead of Chairman Jas. A. McKenzie a final drive was being made. The subscriptions the first day were less than \$2,000 and \$600 at Pembroke. The rest of the county probably raised enough to bring it up to about half. The returns from yesterday's work were not compiled at the press hour, but much is yet to be done to bring the total up to the minimum amount asked.

It will not do for Christian county to come up lacking and unless the full amount is secured, the campaign will in all probability be continued until it is.

FOLLOWING THE FLAG.

Both of the Waller boys have been promoted since they returned from their visit home last week. Trice is now a "Top Sergeant" and Robert a "Supply Sergeant." Their promotions were on the bulletin when they returned to Camp Taylor.

Local Orators in Demand.

Mr. T. C. Underwood on Friday went to Franklin, Ky., and spoke to the High School students on "The Poetry and Music of War." Next week Prof. L. E. Foster will deliver a lecture to the same school.

Erecting Brick Building.

The Acme Mills is having erected a brick building, cor. East 17th and Railroad, to be used as a cooper shop, in the manufacture of barrels, etc., for handling the mill products. The building is 48x80 feet.

'POSSUM AND TRIMMINGS

Annual Dinner By Mr. G. Howard Stowe—A Delightful Affair.

The annual opossum supper which Mr. G. Howard Stowe gives every November to a number of his friends was given Friday evening, with covers laid for a dozen. Mrs. Stowe was assisted in doing the honors by Mrs. J. R. Caudle, Jr., and Miss Julia Baker. The menu consisted principally of 'possum with all necessary trimmings, but the dinner embraced practically everything that the taste could suggest, served in the elegant and hospitable style for which Mr. and Mrs. Stowe are noted. After dinner a pleasant hour was spent in smoking, joke-telling and speech making. It was a most enjoyable occasion, one feature being the contribution of a poem by Mr. Geo. E. Gary, a gem in its sentiment and diction. Those present were Rev. H. E. Gabby, C. F. Jarrett, E. L. Weathers, Mayor R. T. Stowe, Geo. C. Long, W. S. Harned, Geo. E. Gary, Chas. M. Meacham, Dr. J. E. Stone, W. J. Chiles, A. M. Henry and G. H. Stowe.

Following is Mr. Gary's poem: HOWARD STOWE'S ANNUAL OPOSSUM SUPPER.

"Friend Host, we're mighty glad we're here,
Now pleasure's bud has burst in blossom,
Midst all this hospitable cheer,
Stands out the luscious fat opossum,
It never occurred to me before,
Why of all dishes he's most winning,
He provokes these smiles galore,
Because he spent his life a grinning.
Anniversaries aren't all unmixed joys,
For don't these milestones all remind us,
That though we still are merely boys,
Another year has slipped behind us?
Although his eye is just as bright,
And welcome none the colder,
Our genial host reflects to-night—
Though smiling still, he's one year older.
But vanish thought of age or care,
Also the Kaiser, dubbed the devil,
With such a host, such tempting fare,
There's nothing on but just a revel,
Our dollars all may fly the air,
And all of us be on our uppers,
But each man Jack's a millionaire,
At one of Howard's opossum suppers.

Home-grown strawberries will appear on Thanksgiving Day dinner tables in Bourbon county.

WILL ERECT \$25,000 PLANT

If Farmers Will Agree to Put In \$1,000 Acres of Tomatoes Next Year.

HERE'S A LIBERAL OFFER

Experienced Man With Ample Capital Wants to Locate Canning Factory.

Secretary G. E. Dalton, of the H. B. M. A., has a proposition from a party who has been in the canning business for 31 years, who proposes to establish a canning factory in Hopkinsville covering three acres of ground, at a cost of \$25,000.

He wants the farmers of Christian county to pledge 1,000 acres of tomatoes and in turn he will agree to buy them all at \$12.50 a ton delivered.

The company he represents has a factory at Owensboro and Daviess county has pledged 1,500 acres for 1918. The average yield per acre is about ten tons.

It has also been operating at Union City, Tenn., for 17 years. The party promises to take all kinds of vegetables in addition to tomatoes. He thoroughly understands the business and has made it a success elsewhere and is satisfied he can do the same here. He does not ask for money of stock subscriptions, but only wants the farmers to furnish him with products that ought to yield them \$125 an acre. His factory would employ about 500 hands, white and colored, during the canning season.

All farmers who will grow tomatoes in any quantity are asked to communicate with Secretary Dalton, of the H. B. M. A., Ben McReynolds, of the Christian County Board of Agriculture, District Farm Agent Wyatt, or anyone else connected with the H. B. M. A. or County Board of Agriculture.

FINE SALE.

\$10,000 of Registered Jerseys Sold at High Prices.

The sale of 90 head of Jersey cattle by Gore & Rogers Saturday was a big success and high prices were realized for everything offered. One of the cows brought \$285 and even the little calves brought \$50. The Elk Valley Farm, of Todd county, was a large buyer of the milk cows and W. W. Bradley bought several head, but most of them were bought by parties in Christian county. Mr. W. L. Gore bought a good many himself, the partnership stock being sold for division. The day was fine and the sale was largely attended. Auctioneer Roberts was an expert in his line and made the sale in record time.

atre.

A bomb made of gas pipe and powder was picked up Friday night on the main floor of the Auditorium Theatre, Chicago, where the opera Dinorah was being sung, after an incipient panic which followed an unexplained burst of flame was stilled by Director Campinini swinging the orchestra into "Siar-Spangled Banner." The bomb was found by a fireman seeking the cause of the flame. It consisted of a foot of gas pipe filled with powder with a fuse attached.

Weather for Week.

Weather predictions for the week for the Ohio Valley follow: Generally fair in the lower Ohio valley. Some slight probability, however, of rain by end of week. No decided temperature changes.

More Casualties.

The following American names appear in the last casualty list: Wounded and gassed—M. McConnell Terre Haute, Ind. Gassed—Albert Jones, Los Angeles, Calif.

CHANCE TO TRAP HUNS

Italians Have Stopped Teuton Advance and Taken 2,000 Prisoners.

LATINS COUNTER SUPERB

Austro-Germans Fail to Break From War Trap Near Zenson, Lose Heavy.

All along the Piave river the Italians are holding the German and Austro-Hungarian armies in check. No where have the invaders been able to cross the stream and at several places where they had previously gained access to the western bank they have been brilliantly counter-attacked and forced to withdraw to the river edge.

On the Zenson loop sector in the south the enemy has endeavored to extricate himself from his serious position, but the Italians, putting down an attack with heavy losses, closed in upon the invaders and made more precarious their situation. The Italians, in the fighting along the western bank of the waterway, have captured considerably more 2,000 prisoners and also taken 27 machine guns. In the Fagare zone the enemy has been completely vanquished and forced to give up his position.

In the hilly region representing the northern front between Lake Garda and the region south of Feltre, all the Austro-German attacks, some of them delivered with extreme violence, have been repelled, according to the Rome war office, although they assert that northeast of the Asiago and between the Brenta and Piave rivers the Italians have been driven from mountain positions.

No advices have come through to show that the British and French reinforcements have reached the Italian line in any considerable numbers but the "few days" which it was announced last week must intervene before they could stiffen the front now are at an end. Therefore it is presumed that with the Italians having bora the brunt of the Teutonic allies attack during the last week unaided, the aid of the allies in their line will turn the balance of the scale in their favor.

One hears talk in high quarters that if the Piave line holds another few days the tide will be turned, as its successful defense through six fearful days has established that the enemy has his limitations.

Federated Clubs To Meet

The Federated Clubs of the Second Congressional District will hold an all-day session at the Elks Club in Hopkinsville on Thursday, November 22. Delegates from Morganfield, Hawesville, Henderson, Owensboro, Madisonville and Hopkinsville clubs, eleven clubs in number, will bring reports from their work of the past year. Mrs. W. C. Morton, of Madisonville, chairman of this district, will preside. It is hoped there will be a large attendance of women from both the town and county.

Several speakers of note will be heard, among them Mrs. R. T. Lowndes, of Danville, State Federation President; Mrs. Marion Lewis, of Louisville, one of the active workers in the Women's Council of National Defense, and Victor Bogard who has just been in person to Belgium and will give first hand reports of the work of the Belgian Relief.

Both men and women, whether club members or not, should attend all the sessions of this meeting as the war work in its different phases will be the uppermost theme of discussion and it is not always we have the privilege of hearing a number of good speakers in one day.

Pollard Winn, a Caldwell county soldier, died at Camp Taylor last week of measles.

Ninety per cent. of the people in this country who are prosperous have not subscribed to liberty bonds, Red Cross or Y. M. C. A., and yet they would be highly insulted if they were told they were not good Americans.—Elizabethtown News.

Major Simon Bolivar Buckner has arrived in the United States from the Philippines to take charge of the Signal Corps. He is a young son—child of his old age—of the Confederate general and former Kentucky Governor of the same name.

Liberty Loan dollars are piling into the Treasury in such volume it is impossible to count them. Receipts have swelled the total amount in cash in the Treasury to a new historical record. The net balance is estimated at a billion and a half.

Renewed expressions of sympathy for Belgium's sufferings and assurances of the determination of the United States to prosecute the war against its persecutors to a successful conclusion, were sent to King Albert Friday by President Wilson in a cablegram congratulating the King on his birthday.

Since Nov. 1, in England, it has been made illegal for any automobile owner to drive his car merely for his private convenience. If a policeman sees an automobile standing outside a hotel or theater it is his duty to find the owner and investigate the use which he is making of his car. If the car is being used for any purposes other than those provided in the new regulations the owner is prosecuted for wasting gasoline.

In a speech at a meeting of navy engineers in New York, Simon Lake, the inventor, pointed out the fact that but one British vessel of more than 1,600 tons was reported sunk by German submarines last week as an indication of possible danger to American shores of the submarine menace. He cited the trans-Atlantic trips of the merchant submarine Deutschland and the activities of the U-53 off the north Atlantic seaboard as examples of what is possible with the submarine.

Israel Putnam, the fifth in descent from Gen. Israel Putnam, of Revolutionary fame, has enlisted as a marine private and is rapidly completing his training and is awaiting orders to France. Young Putnam says: "I chose the marines because they see much active service. My family has become identified with American history by taking part in all wars since the Revolution. I hope to do my full share in the present war, but am willing to give my service as a private and earn promotion as I merit it."

Bread rations to civilians in belligerent and neutral countries to date are as follows per head: Bulgaria, 16 ounces; Denmark, 10 ounces; Germany, 9 ounces; Austria, 9 ounces; Sweden, 8 ounces; Holland, 3 ounces; Switzerland, 3 ounces; Italy 8 ounces; England, 12 ounces; 8 ounces; England (restaurants), 7 1/2 ounces; Turkey, 5 ounces. Bread in Germany is made of flour containing 94 per cent. of wheat; in Austria the flour is 90 per cent., while 85 per cent. is used in France, and the allowance is 16 ounces.

A Big Job.

Little Esther stood gazing at the sky, and turning to her mother, said: "Mamma, how do you suppose God ever got that great big sky up there without breaking it?"

A TRYING ORDEAL

By RAY BURNHAM.

The big ruffian tried to edge me to one side, but I held my place. "Everything gone but section eleven," the ticket seller had said. "I'll take lower berth eleven, then—J. B. Cole," I spoke quickly. It was there that the burly scoundrel who had jostled me stepped on my foot.

"Sort of clumsy, aren't you?" he grunted. "Hey—upper eleven!" I groaned. He gave me a stare. I picked up my satchel and started for the train. The thoughts of having the bunglesome churl for a companion depressed me.

He came stamping into the train just as I had got comfortably disposed, facing the front of the car.

"Sit over," he said, friendly enough, and crowded me again the window. "Makes me sick to ride backwards."

The fellow was a giant and must have weighed two hundred and eighty pounds. To make it worse he was a wriggling, uneasy thing.

"Hard work for me to sleep on a train, as it is," he said. "Upper berth—yah! How will I ever get up there." "There is a ladder," I observed curtly.

"And it's narrow and shallow. Reckon I'll draw the curtain and sit up, hey? Anyhow, till midnight—what say?"

"I think I'll take a smoke," I said, and arose.

I had to fairly clamber over that mountain of flesh. I got over one knee of the sprawled-out monster. There I stuck. He had to help me over the second knee. I reached the smoking compartment flustered. A perfect cigar calmed and soothed me, once away from that sprawling, lurching absurdity. I thought of Isora, and life became sweet again. I was going to Springfield to marry Isora. The wedding was to be the next afternoon.

"For Isora's dear sake!" I whispered to myself. "I'll be humanitarian—aye, charitable!" I went back to the section. I took the other seat, I smiled, I tried to be jolly.

"Look here," I proposed to the bulky bundle of humanity opposite me, "don't you think you would be more comfortable in the lower berth than on the narrow upper one?"

"Don't I think it?" shouted my companion. "Don't I know it!"

"Well, I will exchange with you," I stated with impressive courtesy. "It will be more comfortable."

"Huh!" growled he. "More comfortable—surest thing you know. Thunder!"

The upper berth was a relief to me as I finally piled into it. I settled myself down for sleep.

"Zzz-zzz—Rob-gr-Roh!" proboscis and throat gave out a swanging, distorted mixture of nasal notes and gutturals. Hour after hour I tossed to a resonant snoring chorus.

"When I clambered down from my aerial perch it was broad daylight. I had searched for my cigar case first thing, cherishing my usual ante-breakfast smoke, and could not discover it. I found the lower berth vacant, poked around, did not come across the case, and wondered if I had not left it in the smoking compartment the evening previous. Thither I went. Sprawled in the biggest easy chair, complacently puffing at the last half of a cigar, was the human mammoth.

"Yours?" he hailed, extending my cigar case—empty! "Fancied so—found it on the car window. Rare weeds—ought to know. I smoked all three."

"Thanks!" I said sarcastically, and pocketed the case.

It was raining when we reached Springfield. That horrible giant was at my side as I went to the edge of the depot platform, where a solitary one-seated automobile stood. I hailed its driver.

"Take me to—" And I gave number and street, designating the home of my fiancée.

"Hold on—that's my way, too!" blundered in my evil genius.

"Room for one only," explained the chauffeur.

"Nonsense!" uttered the fog-horn voice. "I can crowd in between you," and I shrank and shuddered as he sat half way over me. The machine started up.

"This will do for me," observed my companion, as the automobile halted in front of the home of my beloved.

He picked up his satchel and proceeded up the steps, leaving me to pay the chauffeur. He rang the door bell. As I reached his side I heard eager tones beyond the portal. The door opened—Isora.

"Oh Julian!" she cried, and was about to throw her arms about me when she observed my companion.

"Why, brother!" she exclaimed, "I thought you wasn't coming."

"It's me—changed my mind," called out the giant.

"I—I hope you haven't come to object," faltered Isora anxiously.

"Why, yes, I have," declared my prospective brother-in-law.

And then he gazed at me, he poked me in the ribs playfully, he winked, he chuckled, he glowed.

"I object to you two living in a flat," he added jovially.

"I caught this young man's name at the depot and I determined to try him out. Isora, he'll do—I approve. Of all the models of a perfect man, he's stood the test, and as soon as you're married, pick out the best house and let five thousand dollars will buy and accept it as my wedding gift."

GLAD TO TESTIFY

Says Watoga Lady, "As To What Cardui Has Done For Me, So As To Help Others."

Watoga, W. Va.—Mrs. S. W. Gladwell, of this town, says: "When about 15 years of age, I suffered greatly. Sometimes would go a month or two, and I had terrible headache, backache, and bearing-down pains, and would just drag and had no appetite. Then... it would last two weeks, and was so weakening, and my health was awful."

My mother bought me a bottle of Cardui, and I began to improve after taking the first bottle, so kept it up till I took three... I gained, and was well and strong, and I owe it all to Cardui.

I am married now and have 3 children. Have never had to have a doctor for female trouble, and just resort to Cardui if I need a tonic. I am glad to testify to what it has done for me, so as to help others."

If you are nervous or weak, have headaches, backaches, or any of the other ailments so common to women, why not give Cardui a trial? Recommended by many physicians. In use over 40 years. Begin taking Cardui today. It may be the very medicine you need.

"ATTABOY," THE BATTLE CRY

Familiar Baseball Term So Popular in United States Has Found Way to the Trenches.

There is one purely American cry which was heard on the battlefields of Europe before our first troops arrived there. It is the baseball yell, "Attabor," which is the brief and sharp way of saying "that's the boy."

This word may become the battle shout, the rallying cry, the yell of the charge when our boys go into action. Certainly it has been frequently used along the western front from the channel to Switzerland and also on the Italian front. Carried abroad by English, French and Italians who lived in the United States, but who returned when the war broke out, this distinctly baseball expression has often been echoed in the trenches.

American newspaper correspondents visiting the front in Flanders and in the snow-buried Italian Alps have time and again been greeted by this word. It was like a message from home and was intended to let the visitors know that some one from home was there doing his bit. It has been a cry of recognition and welcome.

All baseball fans are familiar with this word made famous by Hugh Jennings, and doubtless a majority of them firmly believe he coined the expression. Perhaps he did, although it is stated on fairly good authority that it came into use in the days of "Pop" Anson. But it was Jennings who fastened it upon the public mind, and Jennings always will be associated with popularizing it.—Brooklyn Standard-Union.

AN AWFUL JOLT

De Artist (proudly)—Here's a painting I have just finished. What do you think of it, old man?

De Critter—It isn't half bad. By the way, did you draw on your imagination for those ostriches in the background?

De Artist—Ostriches! Why, you squint-eyed duffer, those are angels!

USE OF OTHER SENSES.

Sir Arthur Pearson tells of an interesting conversation he had with his old friend, Lieut. Gen. Sir Robert Baden-Powell, who, although he has excellent eyesight, makes a habit of doing many things as though he were blind. He blindfolds himself for regular periods, and "he encourages his Boy Scouts to do the same thing, recognizing that by temporarily depriving themselves of the use of sight, they are enabled to cultivate the use of the other senses to a degree which is impossible so long as the eye is employed."

MEAN.

"They rejected him because he had flat feet."

"And you were accepted?"

"Yes."

"Lucky for you it's flat feet, not flat heads, they object to."

SOME READER.

"He's a great reader."

"In what way?"

"He keeps up on all the continued stories in eight magazines."

MORE REGULAR.

He—Do you believe in life insurance?

She—Some of my husbands did, but personally I prefer alimony.

THE IDEA.

"Your boss wants to work you for something. It is easy to see through that raise in your salary."

"Perhaps so. It was an X raise."

GETTING BY.

She—Why don't you call me "dear" nowadays?

He—And have Mr. Hoover warn me to find a substitute?—Index

How About Other Senses?

"The sense of direction is so strongly developed in the average man," stated Prof. Pate, "that he can rise in the middle of the darkest night that ever was, unerringly find his way clear through the house to a burglar-proof safe, work the combination without a light, take out a bottle of hair restorer and drink heartily of its contents by mistake for the cough remedy which stands on the little table beside his bed."—Kansas City Star.

Motion Pictures "Edited."

After a moving picture reel has been made it must be "edited" in somewhat the same method as is a manuscript. This operation is performed by the editor making his direction in a dictating machine as the reel is worked off in front of him.

Eczema spreads rapidly; itching almost drives you mad. For quick relief, Doan's Ointment is well recommended. 60c at all stores.—Advertisement.

All Nickels.

Judging by the looks of the collection plate that passes us at church, nine-tenths of the members of the congregation seem to think that heaven is only seven squares away, and that the church is a trolley car that carries the saints at the usual rates.—Houston Post.

Children Cry FOR FLETCHER'S CASTORIA

Nature's Disinfectants.

Never forget the old reliable bleaches and disinfectants that Mother Nature and the primitive homemakers of the race have used for aeons—sunshine, fresh air, and boiling water. They are cheap, inexhaustible in supply, and ready at hand. Resort to them freely. Even hot water, cooled enough to be barely endurable, will serve to disinfect a fresh wound if nothing more vigorous is at hand. Common salt is one of the most effective antiseptics.

For croup or sore throat, use Dr. Thomas' Eclectic Oil. Two sizes, 30c and 60c. At all drug stores.—Advertisement.

Wesley's Retentive Memory.

Samuel Wesley reproduced from memory after a lapse of 25 years an oratorio covering upward of 300 closely written pages which he had composed early in life. He said that he saw the score in his "mind's eye" as accurately as if it lay before him.

CITY TAXES

Under Section 3400 of the Kentucky Statutes, interest at the rate of eight per centum per annum is now being added to all unpaid city taxes. This interest has been running since October 1, 1917, on taxes for the year 1917, and if said taxes are paid now very little interest will have to be paid. On all city taxes for the year 1917, which remain unpaid on the first day of December, 1917, an additional penalty of 6 per centum will be added.

The city officials have no desire to inflict the payment of interest and penalties on the tax payers, but the law makes it my duty to collect the interest and penalty above mentioned if taxes are not paid before the dates on which said interest and penalty, under the law, are added.

Persons, firms and corporations who have not paid their city taxes are requested to settle same now and thereby escape the payment of future interest and penalty.

This October 8th, 1917.
W. R. WICKS,
Commissioner of Finance City of Hopkinsville, Ky.

THE THRICE-A-WEEK EDITION OF THE NEW YORK WORLD

IN 1917

Practically a Daily at the price of a Weekly. No other newspaper in the world gives so much at so low a price.

The value and need of a newspaper in the household was never greater than at the present time. The great war in Europe is now half way into its third year, and whether peace be at hand or yet be far off, it and the events to follow it are sure to be of absorbing interest for many a month to come.

These are world-shaking affairs, in which the United States, willing or unwilling, is compelled to take a part. No intelligent person can ignore such issues.

THE THRICE-A-WEEK WORLD'S regular subscription price is \$1.00 per year, and this pays for 156 papers. We offer this unequalled newspaper and the

HOPKINSVILLE KENTUCKIAN (Tri-weekly) together for one year for \$2.65. The regular subscription price of the two papers is \$3.00.

A Tedious Business.

The president of the United States has to sign his name about 20,000 times in the course of a year.

Children Cry FOR FLETCHER'S CASTORIA

REPUTATION

Unyielding adherence to principles gives character to a financial institution and safeguards the interests entrusted to it; but it is the individual method employed in business dealings which distinguishes a bank and establishes its reputation. We are proud of ours.

Chinese Scotch Guards Never Returned

"Over the top!" Yes, that is just where they are going. There are not many of them to be seen here, but there were others—thousands of them. They are the Scots Guards going into action on the Flanders' Front during the recent drive. The scene shows a late afternoon attack in progress—one of the first of the victorious offensive of the British. The men who are shown in this picture will never be pictured again, for they, with hundreds of others, were mowed down before the machine gun fire of the retreating Germans. Dispatches tell of the slaughter of practically the entire Scots regiment, whose van guard is seen silhouetted against the western sky in this remarkable picture.

CONTRACTOR AND BUILDER

HOME-GROWN SEED IS THE SUREST AND BEST

SELECT SEED CORN

ENOUGH FOR TWO YEARS

For 1918 Plantings and to Insure Adapted Seed for 1919

START RIGHT NOW!

WHERE?

In the field from standing stalks of a variety that has "made good" and become locally adapted.

HOW?

Pick best ears from plants showing best yields in fair competition with neighboring plants. Stem-proof plants with hanging ears give best seed. Long ears with large, uniform kernels are the best. Avoid sappy ears heavy with water.

WHEN?

As soon as ears are ripe and hard—before heavy frosts or autumn rains injure the kernels for seed. The day the ears are selected they should be hung where they will become thoroughly dry in a few days.

WHY?

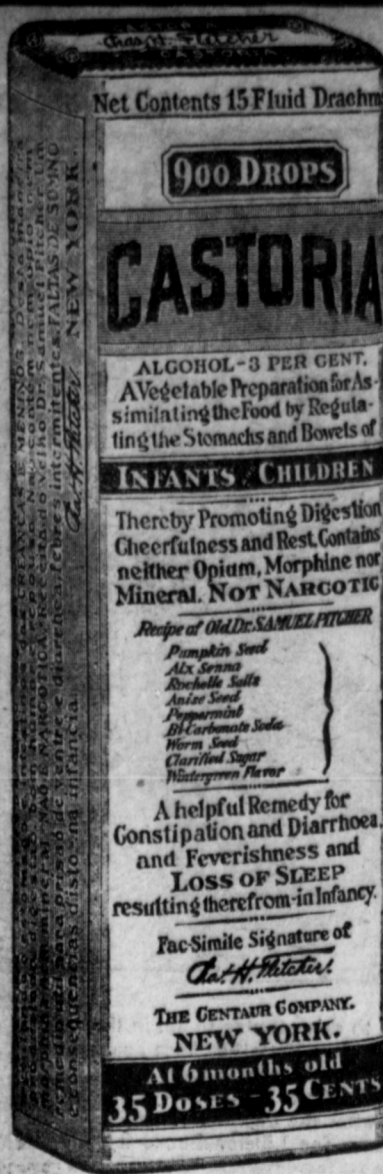

It pays. Field selection of seed corn is one of the surest and best paying operations on the farm. Proper care of seed corn pays well. Tests show that properly cured seed corn has yielded eighteen bushels more per acre than crib-stored seed from the same field.

Insure a Right Start for Your Next Two Corn Crops by Saving Ample Seed Now

A HEART STORY.

By WILLARD CHALLONER.

"One hundred dollars!" exclaimed Warren Deane in a positive burst of ecstasy.

"Two hundred, my dear fellow," corrected Rupert Thrall, picture broker. "Why do you minimize a really pretentious streak of fortune?"

"Because I agreed to give you an even half of whatever 'The Masqueraders' sold for."

"We will waive that in this instance," Thrall asserted. "I've got faith in you, in your ability and in your final fame and fortune, therefore I insist on financing you, to an extent, and making up for it when I am selling your pictures at thousands instead of hundreds. So I decline to take my commission, provided you follow my directions explicitly as to the investment of the money."

"And that is?" submitted Warren.

"Take a vacation."

Warren Deane had been a home boy, living a quiet life with his widowed mother until she died. Alone in the world, he followed the bent of his mind in the direction of art and literature.

The sale of "The Masqueraders" was his first streak of luck. He followed the advice of the only friend he had found in the great wilderness of the city, the picture broker, and two days later was established in a quiet village boarding house at Virden, and roaming the hills with easel and color box, seeking subjects and studies.

One morning he was sketching out in crayon a dell outline upon the canvas, when a little miss of about five passed along a woodland path fringing the deep gully beyond. A great bushy dog frisked about her. Her charming face, her graceful bow attracted him and irresistibly his eyes followed her. Suddenly, appalled, he sprang to his feet from the camp stool. In switching about her, the dog brushed too close to the child—she toppled, and went out of sight over the edge of the cliff.

Shocked, half-stunned, shuddering, Warren ran to the ledge. A great sigh of hope rent his lips as, five feet down, he saw the child wedged against a slanting rock and crying with fright and clinging to a frail bush. Beneath yawned an abyss.

"Don't move! Don't let go!" cried Warren. He was trembling all over as he let himself over the ledge. He uttered a gasp of joy as his feet were anchored. Slowly lifting the child, he pushed her beyond the ledge, climbed up himself, and fell upon a log, breathless and exhausted.

Warren soothed her and carried her to where his easel stood, and placed her on the camp stool.

"Now you must rest, and then go right home, and don't ever get so near the ravine again," he said.

"And I'll tell Maude how good you are, and she'll just love you," prattled the innocent. "And—oh, my! I'll get some more doughnuts and bring them here, and it will be my picnic, and you are invited. Won't that be grand?"

Warren resumed his work. Sure enough, at the end of two hours the little one reappeared. She carried a paper bag, which she placed carefully on the stool.

"I told sister Maude, and she said I must thank you, and bring you home with me, for her to thank you."

And then little Winnie questioned him about the easel, and his being there, and what was an artist man. He caught her pose with a true artist's eye as, on tip-toe, she held one of the doughnuts above her head, the dog standing on his hind feet and reaching for it.

"Don't move—keep that way," ordered Warren in a fever of enthusiasm, while he sketched the presentation rapidly. "I'll make a canvas of it. That will do."

Warren tried to evade going home with little Winnie, though invited, but she was persistent. When he came to meet Maude Springer, whom he never afterwards forgot, she was all that was lovely, dainty and gentle.

One day at the village he learned that Maude Springer, although she lived humbly, was heiress to one of the largest estates in the district. The same day he packed up his kit disconsolately. He would never tell his love!

"I will not even tell her good-by—it is better to go now, before I suffer more deeply," he mused. "I wonder, though, what she would think if I told her that I loved her, and asked her to become the wife of a poor but devoted suitor, and—"

All of this was what Warren Deane wrote as a story in the woodland dell that sunny, last afternoon in paradise. It was his true heart story. He left the sheets across the camp stool, as he proceeded some distance away to take down and pack up a hammock he had strung between two trees in a shady nook.

He came back to get his other traps together, little knowing that during his absence Maude Springer had visited the spot. She read the pathetic heart story. Then she took up its last page and added—"finis!"

And this was the "finis" that Warren Deane found added to his true heart story.

—and Maude Springer would have said 'yes,' and the bright desire of her life would be to lay at the feet of the man she loved, not only her loyal devotion, but her fortune, to help him to give to the world some great work of art that would make him famous.

(Copyright, 1917, Western Newspaper Union.)

Will It Bring Them Down

When Gloves Became Popular.

Although worn before, gloves did not find favor with women until the fourteenth century, when they were always in evidence. If not on the hands, in them or carried stuck in the girdle, the stitching that made the fingers extending far down the back of the hand and finished off with fancy stitch and embroidery, the gauntlet often jeweled, the whole glove perfumed.

The Art of Living.

If music is the art in which you are ambitious to distinguish yourself, you may have to go away from home to get the necessary training, and perhaps cross the water, to secure the finishing touches. But the art of living can be practiced right at home, and very likely you will have as good instruction as can be found anywhere, in the circle of your own family.—Exchange.

Modern Magic.

The fairy's wand which turned a ragged gown into a dress fit for a princess, and a pumpkin into a coach, is not altogether a myth. The cheerful disposition which sees everything at its best, rather than its worst, makes as wonderful transformations. The magic of cheerfulness is still at work.—Exchange.

Needed Experience.

A lady person has to live a good bunch of years before she is more concerned about how her shoes feel to her feet than about how they make her feet look to other women.—Houston Post.

Give You Three Guesses.

"What subjects are best adapted for beginners' practice in mind reading?" asks the inquisitive subscriber of Wharton. That sort of thing is Sanskrit to us, but if you hear a girl ask her beau why he doesn't save his money by investing it in a bungalow you might see if you can make out what she is thinking of.—Houston Post.

What One Needs.

'Tis a good old world to live in, so you need yourself a house; to love in, so you need a spouse; to go in, so you need a car or horse; to know in, so you need a college course; to read in, so you need some books; to shine in, so you need good clothes and looks.—Exchange.

Goldsmith's World-Wideness.

One of the most memorable things to be remarked in Goldsmith is the note of world-wideness which he introduced into literature. There is a total absence in him of local prejudice, which is in strong contrast with the vigorous and almost barbaric insularity of Johnson. He had once thought of emigrating to America, and would have done so but for one of those humorous incidents so common in his haphazard life.

A Lost Art.

The old-fashioned man who used to perform parlor tricks has been superseded by phonographs and player-pianos which any fool can operate.—Birmingham Age-Herald.

TABERNACLE.

Friday and Saturday—"One Law For Both."

"One Law For Both," the newest photodramatic spectacle, made under the direction of Ivan Abramson, will be given its premier at the Tabernacle next Friday night with a Saturday matinee performance. The picture is slated for a run of two days and will be shown Friday and Saturday.

The presentation is particularly timely, inasmuch as part of the story is located in Russia. It shows the conditions that obtained in the darkest Empire immediately before the revolution which transformed the

JAMES MORRISON and RITA JOLIVET in Ivan Abramson's "ONE LAW FOR BOTH." Grand Film Productions.

country into a republic, and, in the light of events subsequent to the making of the picture, it may almost be said to have been prophetic. Ivan Abramson, the author and producer of the picture, was himself at one time an important operatic director and producer in Russia, and the atmosphere of the production may safely be assumed to be correct in every detail.

Willing Work Always Prized.

That man will be a joy to his "boss" who will give willing obedience under any and all circumstances. Whatever work falls to his lot will be performed in the best possible manner, even when it is not the kind he chose. An army of such workers would win anywhere against much larger numbers. The pity of it is, that compared with the host that works under protest, the faithful are pitifully few.—Exchange.

Happy Flight.

Many a girl who wouldn't elope will let her imagination run away with her.—Boston Transcript.

Wears New Army Insignia

In his new rank as Chief of the General Staff of the United States Army, General Trasker H. Bliss wears the new insignia of four stars on the shoulders, a departure from the old four stars with the eagle in the center. This new photograph of the Chief of Staff shows him in his new uniform with the new shoulder straps. It is the latest of Gen. Bliss, who succeeded Gen. Scott as head of the American General Headquarters in Washington.

German Sub on Exhibition in New York Is Aptly Called "U-Bought-a-Bond"

A German U-Boat which was brought to this country to aid in the sale of Liberty Bonds and is now in Central Park, New York, has been appropriately renamed "U-Bought-a-Bond," and has become one of the most popular exhibitions of the metropolis. The boat was brought to this country in three sections, and set up to show Americans just what the destructive undersea craft of Germany look like. As a silent salesman for Liberty Bonds it proved a great boon to the campaign. The boat was formerly the UC-6, which was captured by the British. It is 110 feet long and weighs 70 tons. The boat

MISSOURI EGG CONTEST

White Wyandotte Pens Won First and Second Honors and First Pen.

The Sixth National Egg Laying Contest, which has just closed, in many respects has been one of the most successful contests ever held.

Eighty-one hens produced 200 eggs or more each during the year. Eight pens produced 1,000 or more eggs each during the year. One pen of five White Wyandottes produced 1,226 eggs during the year. All hens averaged 117.5 2 eggs each. Rhode Island led with 188, Wyandottes 184 and Leghorns 178.

Pen 35, White Wyandottes, owned by J. F. Jordan, of Crane, Mo., won the \$50 cash and silver cup, by laying 1,226 eggs, which is an average of 245 each. This is the highest average made by a pen at this place.

Pen 49, White Plymouth Rocks, the property of Otto Zimmerman, of St. Louis, won second place, with a record of 1,141 eggs.

Pen 19, R. C. R. I. Whites, owned by Harvey Drew, Vernon, N. J., won third place by producing 1,130 eggs.

Hen No. 354, White Wyandotte, won the individual prize, by laying 273 eggs.

Hen No. 353, White Wyandotte, won the second prize by laying 269 eggs.

Hen No. 196, R. I. White, won the third prize by laying 268 eggs.

There were 80 hens, or 30 per cent. of the contest, which produced 200 eggs or more during the year.

Frederick—Gilliam.

Talmage Frederick and Miss Lucy Virginia Gilliam, both of the Pembroke neighborhood, were married at the courthouse Saturday by Judge Knight. The bride is a daughter of Mr. L. M. Gilliam.

Treatment for Dog Bites.

A dog bite is not always followed by hydrophobia. Wash the wound with an antiseptic promptly and rinse with a solution of water of ammonia—a teaspoonful to a cupful of boiled water. Further to insure safety, the wound may be sucked out, but this should not be done until it has been cleansed and rinsed. Anything sucked out should not be swallowed, and the mouth should be rinsed. Of course, a surgeon should be consulted.

Early sown wheat in Kentucky is looking fine.

\$100 Reward, \$100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages and that is catarrh. Catarrh being greatly influenced by constitutional conditions requires constitutional treatment. Hall's Catarrh Medicine is taken internally and acts thru the blood on the mucous surfaces of the system thereby destroying the foundation of the disease, giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in the curative powers of Hall's Catarrh Medicine that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address P. J. CHENEY & CO., Toledo, Ohio. Sold by all Druggists.

PURELY PERSONAL

Edgar Pyle, of the local postoffice force has been notified of his appointment as assistant postmaster, a deserved promotion. This position has been vacant some time. Mr. Pyle has been a clerk in the office for about 15 years. The promotion gives him a salary increase from Oct. 1.

H. A. Robinson has been appointed on the local Council of National Defense to succeed S. L. Cowherd, resigned.

Geo. E. Gary and J. M. Forbes were in Louisville yesterday.

Mr. and Mrs. Chas. M. Meacham, Jr., and children returned to their home in Union county yesterday, after a visit to relatives here. They made the trip in an auto.

Miss Matilda Young, of Morganfield, visited friends at Pembroke Saturday and Sunday.

Miss Elizabeth Robertson, of Union county, visited Mr. John C. Gary's family Sunday.

Mrs. John C. Gary is visiting relatives in Union county.

Brockman Mason, who was a soldier in Co. L, at Murray, has received his honorable discharge for a physical disability and has returned home.

Mrs. Gentry Hillman, of Birmingham, is visiting her brother, R. M. Wooldridge.

Mrs. Fannie C. Hille has returned from a visit to her daughter, Mrs. Percy Richardson, at Clarksville.

Among those who attended the funeral and burial of the late Mrs. Lannes H. Huggins Sunday were the following: Charles H. Rex and Raymond McCoro, Hustisford, Wis.; Mr. and Mrs. Gary Huggins and W. B. Wilson, Clarksville, Tenn.; Mr. and Mrs. John Rolls, Carlisle, Tenn.; Mrs. Joseph Ferguson, Dover, Tenn.; Frank Reese, Nashville; Mrs. Edwin Bogard, Lilbourn, Mo.; John Bogard and Mr. and Mrs. Charlie Wilson, Golden Pond, Ky.; Mr. and Mrs. Ed. Waller, Earlington, and Mr. and Mrs. Petsch, Evansville.

Daily Optimistic Thought.

We are only vulnerable and ridiculous through our pretensions.

Any Relation between Kairer and Highwayman?

Holworthy Hall has written a story for the December American Magazine in which the hero says to the heroine:

"Later on you may get to wondering if it's been worth while—wasting this day. For you, I mean, not for me. So I want to tell you this: If you call it worth while to have given me a feeling that I never had before in all my life, then you've done it. I don't know exactly how to describe it to you, but I feel as though it's all mine." He embraced all points of the compass in his inclusive gesture. "I feel as though these people on the street belong to me, and you do, too; I mean, as though we're all one big crowd over here, and everybody's working and fighting for everybody else, and everybody's sort of related to everybody else, and there isn't any such thing as a stranger. I'm not sure if you get that, but—

"And still," she said, "you're going back to shoot and kill and—"

"That," he said calmly, "is exactly why I'm going! I'm going to shoot as straight as I can, so there won't have to be any danger of shooting and killing after this one war is finished. You can't stop to argue with a highwayman, you know. You remove him—so he can't hold up anybody else. And I don't feel related to the Fritzies, they are the highwaymen of the whole world. Even a minister wouldn't try preaching to a thug that was strangling him! And everybody I can see now looks like an old friend of mine; and men can fight like tomcats for their friends."

All grain acreages in Georgia will be increased this year.

Suffered Several Years. PERUNA MADE ME WELL

Mrs. Elizabeth Reuther, 1002 11th St., N. W., Washington, D. C., writes: "I endorse Peruna as a splendid medicine for catarrh and stomach trouble, from which I suffered several years. I took it for several months, found my health was restored and have felt splendidly ever since. I now take it when I contract a cold, and it soon rids the system of any catarrhal tendencies."

Its My Standby for a Cold.

Those who object to liquid medicines can procure Peruna Tablets.

Name Legally Changed

Theodosia Goodman, who petitioned the court as an actress who has become celebrated through her own efforts, was given the legal right in New Port to use the name Theda Bara both on and off the stage.

The change of name was general in the family of the famous motion picture "vampire." Her father, mother, two sisters and a brother also became Baras instead of Goodmans.

The petition stated that Miss Bara was "over 21 years of age" and that she was born in a Cincinnati. Her father is a native of Chorsel, Poland, while her mother was born in La Chaux de Fouds, Switzerland, the daughters of Francois Bara de Coppet. It was explained that Bara "is an old family name."

Hopkinsville Won.

The Football game at Russellville Saturday between the Hopkinsville High School and the Bethel College teams resulted in a victory for the Hopkinsville boys. The score was 44 to 0.

December American Magazine.

Dr. Frank Crane, the famous editorial writer, has written for the December American Magazine an article called "If I Were Twenty-One the Things I Would Do." Every young man should read it. Holworthy Hall begins a series of short stories with "Straight From Headquarters." "Getting Next to People" will help you to do so; "The Book That Helped Me Most" is full of good things; and "Russet and Gold," a love story by William Dudley Pelley, will hold you from first to last.

Louis K. Liggett, the famous drug store man, has written an article filled with suggestions for business men. Marguerite Clark tells about her experience on the stage and in the movies; and "Detroit" is the second city to be dealt with in "The Flavor of the Cities." H. C. Witner has a funny story in this number, and with the other articles and stories, an excellent number is completed.

Tennessee has sown a much larger wheat average than usual.

WANTED 5,000 Turkeys This Week

We guarantee to meet all legitimate competition and pay as much as any one for produce. We will pay this week, up to and including Friday, Nov. 23,

York Mother Finds Ideal Cold Treatment For Her Little Boy

Nothing to Swallow—You Just Rub It On.

Mothers everywhere will be interested in the experience of Mrs. Chas. Smith, 623 West Gas Alley, York, Pa. Mrs. Smith tried the Southern remedy—Vick's VapoRub Salve, when it was first introduced in York, and writes—

"Our little four year old boy had a cough for about a week. We gave him everything we knew, and nothing seemed to do any good. So when we got Vick's VapoRub I rubbed it on his chest well for two nights and I have not heard him cough since. I think it is the best medicine I have ever had in the house."

Vick's VapoRub comes in salve form, and when applied to the body heat, the ingredients are released in vapor form. These vapors are inhaled with each breath, opening the air passages and loosening the phlegm. It's a real "Bodyguard in the home" against all forms of cold troubles. 25c, 50c. or \$1.00. At all druggists.

Keep a little Body-Guard in YOUR home
VICK'S VAPORUB SALVE

About Highways.

Good roads is a relative expression. There are men who think a jumper and a pair of overalls are good enough for their wedding day.

It's not a real good road unless it will take you where you want to go at any time in the day or night, rain or shine, winter or summer.

If it pays you to use the binder instead of the cradle, it will pay you to be able to haul to market twice as much, twice as often as you have been able to do in the past.

Keep the boy on the farm by making your roads so he can get to town in a short time.

There are enough bumps in life without having them in the middle of the road.

Just as well be out of the world as to beat the end of an impassable road.

Always remember you can't have anything worth while without taxes. Even your thoughts can not travel without taxing your brain.

You don't care to build your roads for the tourist. Neither does your rich neighbor want to pay taxes to educate your children.

Bridging difficulties is one of the tasks of the road maker.

A rocky road isn't hard to travel if the rocks have learned to know their places.

You talk about the value of your

RALPH I. SMITH
(4 YEARS OLD)

breath, opening the air passages and loosening the phlegm. It's a real "Bodyguard in the home" against all forms of cold troubles. 25c, 50c. or \$1.00. At all druggists.

farm because it is near a good community center with schools and churches. But the value is off one-third if the weather and road conditions keep you away from them one-third of the time.

Box Supper Nov. 25.

A box supper will be given at Pleasant Grove schoolhouse, two miles south of Crofton, on the Madisonville pike, Saturday night, Nov. 24. There will be a short program, prepared by the school, to precede the sale of boxes. Admission free. Everybody invited.

ELLA ALLEN,
FLOSSIE DUKES,
Teachers.

15000 Of Them

President Wilson, in a letter made public yesterday, expressed his appreciation of the patriotic work being done by the "Four-minute" men a Government agency of 15,000 volunteer speakers who present war-time messages of the Administration to theater audiences.

Missouri has an immense corn crop, and farmers are very busy husking. The quality is fine.

DR. BEAZLEY

...SPECIALIST...

Eye, Ear, Nose and Throat

Julius Caesar—"There's No Difference Between B. C. and A. D."

Evolution of Prices.

1880.

A man went forth with a two-dollar bill. And never a doleful thought. He gave the dealers a list to fill. And this is what he bought:

- 1 bushel potatoes,
- 4 pounds butter,
- 1 ham,
- 5 pounds lard,
- 20 pounds sugar,
- 1 sack flour,
- 3 pounds of sausage,
- 12 bars soap,
- 2 dozen eggs,
- 3 porterhouse steaks.

1900.

A man went forth with a five-dollar bill. Five dollars was quite a lot. He gave the dealers a bill to fill. And this is what he got:

- 1 peck potatoes,
- 1 pound butter,
- 1 ham,
- 1 pound lard,
- 10 pounds sugar,
- 25 pounds of flour,
- 1 pound sausage,
- 6 bars soap,
- 1 dozen eggs,
- 1 porterhouse steak.

1917

A man went forth with a ten-dollar bill. And worry, it filled his dome. He gave the dealers a list to fill. And this is what he lugged home:

- 1 pound potatoes,
- 1 ounce butter,
- 1-2 pound ham,
- 1 pinch of sugar,
- 1 teaspoonful of lard,
- 1 pound of flour,
- 1 sausage link,
- 2 eggs,
- 1 pound round steak.

Hindenburg is Right.

According to the recent press dispatches Gen. von Hindenburg has declared that "America will not amount to anything in this war."

Taking his methods of warfare into consideration, carefully considering the Hindenburg style of fighting, America will not amount to anything in this war.

America will not amount to anything as von Hindenburg reckons military activity, because Americans will not drop bombs upon hospitals in which noble Red Cross nurses are battling to keep life in the breasts of dying men. America will not deliberately wreck churches and cathedrals, and not one orchard will be destroyed or miles of fruit trees chopped down in any part of the world in which they may be fighting.

Every loyal citizen of Breckinridge county knows, and we believe, for that matter, every loyal citizen of this government knows, that America is not going to amount to anything in this war so long as warfare, as von Hindenburg sets it, means a slaughter of the innocents. Americans will not ravish women during this war,

nor any other, nor will they send children of their enemies crying through the streets with their innocent hands chopped off by cruel sabers. Insofar as that kind of warfare the von Hindenburg kind, is concerned, America is going to be a failure. She is also going to be a failure when it comes to distributing poison candy in enemy territory; and she will never win if she has to follow the Hindenburg method of poisoning wells, polluting reservoirs with the filth of out-houses and placing the heads of captives on her flag-staffs as trophies of war.

Insofar as von Hindenburg's ideas of war are concerned, America is not, thank God, going to amount to much. —News.

ORRINE FOR DRINK HABIT

So uniformly successful has Orrine been in restoring victims of the "Drink Habit" into sober and useful citizens, and so strong is our confidence in its curative powers, that we want to emphasize the fact that Orrine is sold under this most positive guarantee. If, after after a trial, you get no benefit, your money will be refunded. It is a simple home treatment. No sanitarium expense.

Orrine is prepared in two forms: No. 1, secret treatment; Orrine No. 2, voluntary treatment. Costs only \$1.00 a box. Ask for booklet.

L. L. ELGIN, No. 12 South Main Street, Hopkinsville.—Advertisement.

Prayed For Repose of Kaiser's Soul—Beaten

Herbert S. Bigelow, of Cincinnati, clergyman, head of the People's Church and former politician, who was kidnapped by a large band of Kentuckians angered at his pacifist statements in which it is alleged he prayed for the repose of the soul of Emperor William. Before whipping him the leader said: "In the name of the women and children of Belgium and France, strike!" His head was covered with crude oil, and he was otherwise beaten. A reward is offered for the kidnappers.

Highway Improvement

MAINTENANCE TAX IS URGED

Governor of North Carolina Would Keep Highways in Good Order and Make Improvements

"To spend \$100,000 to build highways and then leave the roads without provision for maintenance, is folly equal to that indulged in by the farmer who buys \$1,000 worth of farm machinery and then refuses to build a shed under which to keep it."

Gov. T. W. Bickett of North Carolina points to the fact that it is not only necessary for a state to build good roads, but also to keep them in good

Convicts Working on Good Road.

shape and to improve them from time to time. In North Carolina, convicts have been employed on the roads since 1881, but the counties have been required to hire them from the state and pay for them out of the county funds. The counties have, therefore, been parsimonious in their expenditures on road improvements. Governor Bickett suggests that county commissioners be compelled to levy an annual maintenance tax, to be spent by the state highway commission for the upkeep of the roads.

The national committee on prison labor has repeatedly shown the value of employing convicts in road-making. In North Carolina and other agricultural states, this method of employing the convict is particularly advantageous because of the scarcity of labor at this time.

The war brings the matter of the employment of unskilled labor on roads before the public again. Unskilled labor has become very scarce and expensive; yet the present crisis demands that the roads of the country be maintained in good shape to insure rapid transmission of products. The national committee on prisons and prison labor has begun a movement for the mobilization of the convicts of the country in a national and state service for the building and upkeep of good roads.

In this effort the committee will have the hearty support of the American Automobile association through its good roads board, which includes a member from each one of the 600 odd clubs contained in the national body of car owners.

CUTTING HEDGES ON CORNERS

Obstruction is Menace to Motorists in That It Shuts Off View of Approaching Cars.

Along with the better roads that the farmers are achieving comes the attendant better care of hedges, noticeable almost everywhere. The fact that no road can be so good if it has an untrimmed hedge alongside it, is being generally recognized, and the further fact that a hedge at a corner is a menace to motorists in that it shuts off the view of approaching cars, is leading to the cutting of hedges at the intersections, and in many places to their elimination altogether and their replacement with wire.

NEGLECT MAKES POOR ROADS

Carelessness Requires \$2 to Be Spent, Where \$1 Invested Earlier Would Have Done Work.

It is neglect which makes earth roads bad, and requires \$2 to be spent where \$1 invested earlier would have done the work. Every township should arrange for a patrol system of maintenance, or its equivalent, under which someone will give his entire time to a section of roads and be responsible for their condition.

Tool for Foundations.

Operated by one man, a gasoline-driven machine has been invented that delivers more than 1,000 hammer blows a minute to newly laid concrete foundations for roads to give them an even density.

Prejudice Against Oiled Roads.

It may be that prejudice against oiled roads has arisen among too enthusiastic champions of concrete. But concrete costs so much that in many instances its use is out of the question.

GOOD ROADS

SYSTEM OF NATIONAL ROADS

President of National Highways Association Would Have Federal Government Take Charge.

Thanks to the pushful, pervasive automobile, American road building has "got a move on" at last. There is everywhere the cry for roads, for more roads and for better roads. The drawback has been that, as yet, there has been no co-ordination of these multitudinous enterprises. The president of the National Highways Association, Charles Henry Davis, C. E., in a recent paper, stated that we spent last year \$249,955,967, or more than two-thirds the total of money expended so

Good Road in England.

far on the construction of the Panama canal—for our road improvements throughout the country. Mr. Davis' contention is that good roads, roads that run for thousands of miles through state after state, are, properly, not the responsibility of the state, but of the nation. He would have the federal government build a system of national roads joining the West with the East, the North and South, connecting every part of the country, as is the case with the national highways of Europe, and, as history shows, such as was the essential equipment of every first-class power of the past. How would such an enormous construction be paid for and kept up? "Suppose," asks this eminent engineer, "the government built 100,000 miles of properly planned roads, and at the same time purchased, say, 300 feet of land on either side. This land would so continually increase in value, and in demand for leasing on long rental, that the cost of the road and the land purchase would soon be paid. A rental rate of \$6.66 per acre would pay the interest on the cost of construction. But much would rent at vastly higher rates, in cities and towns, high enough to give the nation an income equal to its total annual expenditures"—from these national highways alone!

SYSTEM OF NATIONAL ROADS

We Will Soon See Necessity for Separate Systems for Freight and Passenger Traffic.

President Rowe of the American Automobile association says that in ten years the United States will be covered with systems of national roads. By that time he says we will begin to see the necessity for separate systems for freight and passenger traffic. Present highways will be greatly multiplied and largely increased in width. The quality will be improved as the country begins to learn the art of road building. Good roads he believes, are the greatest practical step toward national preparedness.

BUILDING ROADS IN FORESTS

In Past Fiscal Year There Were Constructed 227 Miles of New Highways—Other Improvements.

During the past fiscal year there were constructed on the national forests 227 miles of new road, 1,975 miles of trails, 2,124 miles of telephone line, 89 miles of fire lines, 81 lookout structures, 40 bridges, 222 miles of fence, 545 dwellings, barns and other structures, 17 corrals and 202 water improvements.

IMPROVE ROAD BY DRAGGING

Ordinarily It is Best to Use Implement When Surface is "Moist, but Not Sticky."

It is probable that you can improve the road by dragging it the moment the drag is purchased or constructed, no matter what is the condition of the earth. Ordinarily, however, it is best to drag when the surface is "moist, but not sticky."

Road Progress.

Missouri and Kansas have both passed new road laws during the recent sessions of their legislatures, and work under them is already starting. Missouri has made longer steps forward toward good roads than ever in her history.

More Receipts for Roads.

The receipts of the Pennsylvania highway department from motorcar licenses were \$147,742 April 1, an increase of \$700,000 over last year. The entire fund is available now.

Larger Fire Pot Burns a Lot of Coal Slowly, While Smaller One Consumes a Little Fuel Rapidly.

The editor of a coal magazine in the American Magazine tells how to use your coal. He says:

"A house furnace works best when a lot of coal is burning slowly in it."

"To illustrate: I have a seven-room house. In it is a furnace with a fire pot that is but 19 inches across and about 13 inches deep. It should be 24 or 26 inches across, and 18 to 20 inches deep. Because that furnace is too small I have to shovel coal four to six times a day. Twice a day is enough. To have installed the larger furnace when the house was built would have cost but \$35 more. It costs me \$100 a year more than necessary to run the small one. That is the difference between burning a little coal fast and burning a lot of it slowly."

"In my furnace the hot water is carried away from my boiler by inch-and-a-half pipes. They should have been two and a half inches. Far less effort is required to force water through a big pipe than a little one. When small pipes are used an unnecessary amount of the power in the coal is used to force the water through small pipes. That is, the heat is used up in the basement in pumping water through the pipes instead of being used in the living rooms to give heat."

BRAVE MEN WORTH WHILE

Face Perils of War Without a Whimper, Smile When They Suffer, Says V. A. D. Nurse.

"While there is none of the romance that the magazine writers and story spinners have woven around our work, yet life is not half so drab as it was in the days of my probationship in the old hospital," writes a nurse, who before going overseas served for two years in one of the big Canadian city hospitals.

"Sister R—, who has charge of the next ward, told us a touching story that has all the elements of tragedy and romance in it. She says that a young soldier in her ward suffered torture from a gaping wound in his side and yet never whimpered. He was always cheery. One day the sister said to him, 'Do you ever have a good cry all to yourself when you are alone?' 'Eh, no,' he said, 'what'd be the use? You must keep smiling.' And then his face suddenly altered as he said:

"Oh, but I did cry once. I'll tell you when. I got a letter from my old dad telling me to come home as soon as I could, as there was an old man who could still do a day's work and who would never let me want for anything as long as I lived. I cried then."

"These are the little things that happen now and then and set you thinking. When I go off duty I am going to see that boy. He is worth while."

ONE WAY.

Wife—How can I keep from walking in my sleep?
Hubby—Take carfare to bed with you.

GOOD CHANCE.

"We're bound to win. There's victory in the air."
"I don't dispute that if we build airplanes."

THE EXACT LOCALITY.

"I understand the man you speak of lives in morbid trepidity, doesn't he?"
"No, sir; he lives in the suburbs."

CLIMAX OF SADNESS.

She—I never read anything sadder than her last novel.
He—No? Evidently you never tackled a joke book.

INDISPENSABLE.

"We need men of push in our business."
"What is it?"
"Electric buttons."

PROTECTION.

"Too cold, daughter, for that thin outfit of yours."
"Well, I'll wear my heavy earrings ma."

DON'T LIKE IT.

Uncle—Well, Susie, what do you do in school all day?
Susie—I wait till it's time to go home.

Hopkinsville People Should Learn How to Combat Them.

You can fight off the billions of germs which you swallow. How about the uric acid which your own system creates? Can you conquer that, too? Yes, if your kidneys work right. But if they don't, headache, dizziness or discolored urine. Soon warn you of your peril. You must live more simply—That's what Hopkinsville has found. Use Doan's Kidney Pills to strengthen your kidneys.

Easy to verify local testimony. Read this case:

J. J. Moore, stationary engineer, 612 Jesup Ave., Hopkinsville, says: "My kidneys were weak and inactive and I suffered with an ache across the small of my back. My limbs and knees ached and pained; and my system was full of uric acid. My kidneys acted irregularly too. I read of Doan's Kidney Pills and used some. They regulated my kidneys and benefited me in every way."

Price 60 cents at all dealers. Don't simply asked for a kidney remedy—get Doan's Kidney Pills—the same that Mr. Moore had. Foster-Milburn Co., Props., Buffalo, N. Y.

One Explanation.

"I like this poem of yours to a brook. It fairly gurgles. You evidently wrote it by a rippling rill." "Not exactly," said the poet, "but I did write it with a fountain pen. Maybe that accounts for it."

Only Dine.

A great artist was once describing the decadence which in so many cases seemed to unfold the middle period of life. "Yes," he said, "old men dream dreams, and young men see visions, but middle-aged men only dine."

START AUTOS BY WIRELESS!

Waves Are Sent Out From Station Five Miles Distant to the Indiana State Fair Grounds.

It has been demonstrated that an automobile can be started by wireless. This was done at a recent Indiana state fair, where the engine of an auto was started every 55 minutes by wireless waves sent out from a station in Indianapolis, five miles away.

An auto on exhibition at the fair grounds was equipped with receiving apparatus and necessary relays and automatic switches for throwing on and off the electric current of the self-starter and magneto. An automatic switch was provided to allow the car to run for 45 seconds, after which the magneto was cut off, bringing the car to a stop, the operation being repeated at 55-minute intervals.

No human hand had any part in the operation of starting the car. A time switch installed in connection with the wireless transmitter in the city controlled the entire operation. From the minute of the operation of the car for the first time, by pressing a key at the transmitting station, until the last day of the fair, a daily record was kept which shows that the starting and stopping of the car were accomplished automatically.

GUM PICKING AS BUSINESS

High Prices, Resulting From Short Supply, Brings Workers in the Woods Big Profit.

Up in the Maine woods is where the professional gum pickers thrive. The consumption has grown so fast and the supply is getting so short that half an ounce of second-rate gum sells for 10 cents. The whole sale price paid by manufacturing concerns is \$1 to \$1.50 a pound, according to quality, and a busy picker and taster can make about \$6 a day.

Most of the gum is picked in March. The gum picker wears steel climbing spurs on his boots and in his belt he carries a light hatchet, while strapped to his waist is a bag with a wide mouth. Climbing a tree he proceeds from limb to limb, chipping off the lumps of gum as he finds them, until he reaches the top. Most of the gum is caught in the wide open bag, while all that goes to the ground stands out in such relief on the snow that it is picked up easily. Sometimes gum pickers travel in parties of three or four, and often the boys of the family make a business of gum picking, earning more than they could by an entire winter's labor in the logging camps.

Always Use High Class STATIONERY to Create a Good Impression

The Very Latest Styles

It's an old, old saying that the people you write to often judge you by your stationery. And there is a great deal of truth in the fact that stationery can be so chosen as to reflect the best of judgment and taste.

Stationery suitable for one occasion may be entirely out of place for another. Then, too, the styles in stationery change the same as styles in clothing.

To be sure that your stationery is right for all purposes, always buy it here.

J. O. COOK DRUGGIST

Man and Other Animals. The essential difference between man and animals is well stated by Doctor Gassot, an eminent French biologist, quoted by the Scientific American. He says the animal is predestined to obey the laws of its species, while man obeys them only if and when he will. A man may, if he wants to, sustain with energy the pretension that two and two make five, or he may commit suicide.

Lines to Be Remembered. The sun illuminates the hills while it is still below the horizon; and truth is discovered by the highest minds a little before it becomes manifest to the multitude. This is the extent of their superiority. They are the first to catch and reflect a light, which, with their assistance, must, in a short time, be visible to those who lie far beneath them.—Macaulay.

Solitude Has Its Value.
Proofs of growth due to solitude are
endless. Milton's greatest work was
done when blindness, old age and the
death of the Puritan government
forced him into complete seclusion.
Shakespeare did his best work in the
solitude of deafness. Bacon would never
have been the great leader of scien-
tific thought had not his trial and dis-
grace forced him from the company of
a grand retinue and stupid court to the
solitude of his own brain.

The day of hardy physics is gone.

Live Wires.
Measuring the current carried from
electric wires by streams of water
from fire hose, an Italian scientist
found that chemical extinguishers
were the most dangerous fire-fighting
equipment to use around live wires.

It Wasn't His Fault.
One youngster in school had deliv-
ered a severe kick in the stomach to
another lad. When taken to task as
to why he had struck his playmate
there, he said: "I didn't mean to hit
him there, but he turned around just
in time."

MARINES ESCAPE TONSILLITIS.

That little or no tonsillitis has de-
veloped among the thousands of
United States marines now in train-
ing at a southern camp, is due, medi-
cal authorities say, to the caution of
examining physicians at recruiting
stations.

An applicant with enlarged tonsils
will not be accepted in the marine
corps, as it has been pointed out
that tonsillitis is more than a "mere
ailment," and in a military camp
will spread rapidly. Medical research
workers have discovered that ton-
sillitis is the "base" of numerous dis-
eases, among which are inflammation
of the joints and heart, the latter
often proving fatal.

WAKED 'EM UP.

"The coming home," replied the
small boy.

NOTHING TO BRAG OF.

"Her ancestors came over in the
Mayflower."

"Yes. Every body."

ROAD BUILDING

BENEFITS OF CONCRETE ROAD

Enables Farmer to Haul Two Loads
at One Trip, Instead of One Load
at Two Trips.

Reduced to simple terms, a concrete
road helps the farmer haul two loads
at one trip instead of one load at
two trips; or, it doubles the size of
the load and cuts in two the tractive
power necessary to transport farm
produce. With less capital tied up in
horses there is more cash to put into
equipment to produce more cash. The
concrete road reduces the strain on
horses and lengthens their lives. It
reduces wear on wagons and harness.
Where motortrucks are used it less-
ens tire and fuel expense. It puts
the farmer in a state of preparedness
to reach markets quickly when prices
are best, and he can take his profits
and get home with more cash than he
could by slow hauling on a bad road.
It adds to the acreage value of a farm
because it increases its earning possi-
bilities. A concrete road makes all
of these advantages permanent, bring-
ing its toll of profit to the farmer
daily in the form of time, money and
effort saved.

METHOD OF PAVING REPAIRS

Cleveland Contractor Reduces Gang by
Use of Pneumatic Chisel—Gas-
oline for Power.

A paving contractor of Cleveland, O.,
has reduced his repair gang to two
men and a foreman for such work as
is shown in the illustration, where a
brick pavement is to be patched. The
city is said to have a larger mileage
of brick than any like area in the
world, and economical methods of re-
pair are therefore important. This
contractor first has all the old paving
removed with pick and sledge, except
along the edge of the patch. There
the old bricks are loosened for re-
moval, with a pneumatic chisel. This
cuts out the old mortar and leaves a

Repairing Brick Pavement.

clean, sound "key" for the new pave-
ment to meet as it is laid. The sound
bricks taken up are also cleaned by
the pneumatic tool and relaid, which
is another economy. Power for the
tools is furnished by a portable outfit
consisting of a gasoline engine and an
air compressor mounted as a unit upon
a truck that can be moved along the
pavement by hand.—Popular Mechan-
ics Magazine.

HIGHWAY WORK IN OKLAHOMA

County, State and Government Co-Op-
erating on Building Road Through
Important Towns.

Oklahoma has made a new departure
in convict road work. Pottawatomie
county, the state, and the United
States office of public roads and rural
engineering are co-operating on build-
ing a road, 35 miles long, which passes
through the important towns of the
county. The county is furnishing the
necessary funds and a portion of the
equipment; the state, the remainder
of the equipment and 50 prisoners and 4
employees.

LIGHT DRAG NOW PREFERRED

Things Can Be Done With It That
Cannot Be Done With Heavy One
—Weight Can Be Added.

Build a light drag. One can do
things with a light drag that he can-
not do with a heavy one. And then
one can weight a light drag to make
it heavy. But how can one lighten a
heavy drag? Do not build the drag
too long; especially if your roadway
is rather narrow or runs between high
banks.

Surfaced Roads in Georgia.

During the five-year period ended in
1914 Georgia surfaced 6,364 miles of
her roads. This is at the rate of more
than four miles per working day.

Feature of Road Development.

A most significant feature of road
development is the construction of bet-
ter surfaces as a result of automobile
traffic.

Most Important Road Tool.

FARM ANIMALS

CORRECT RATIONS FOR PIGS

Animals on Pasture Will Gain Rapidly
If Given Additional Allowance
of Grain Feed.

Pigs, grain-fed on pasture, will gain
a pound or more a day from weaning
to a weight of 200 to 250 pounds, while
those getting little or no grain will
gain but one-half to three-quarters of
a pound per day. This will bring
spring pigs to a marketable weight in
early fall, at the period of high prices,
whereas those being pastured only are
not ready for market until a month or
two later. A grain ration, by bring-
ing the hogs to an earlier market, re-
duces the time of feeding, the risk, and
the interest on the investment. The
animals are in higher condition, with
a finer and more palatable meat and
fat.

Farmers substituting pasture entire-
ly for grain and other concentrated
feeds to their market hogs through the
summer will find that before market-
ing in the fall it will be advisable to
feed grain to harden the soft fat and
meat and put on additional weight.

Light but steady grain feeding on
pasture, however, gives better results
than a heavier feeding during a short-
er finishing period.

GOOD RAM ALWAYS CHEAPEST

Scrub Animal Is Particularly Expen-
sive at Present High Prices of
Wool and Lambs.

A scrub ram is expensive at any time
but doubly so at the present high price
of wool and lambs. A good ram has
many times proved to be more than
"half the flock." Many successful and
progressive sheep breeders trace their
start on the road to success to the pur-
chase of a good ram. Sometimes the
price of the ram has looked high, but
time proved it to be the cheapest and
by far the best investment ever made.

At the University of Missouri college
of agriculture a good mutton ram, such
as any farmer could purchase at \$30
to \$40 this season, bred to western
(Colorado) ewes, sired lambs that av-
eraged two and a half pounds more at
three months of age, when they were
marketed, than lambs, out of the same
class of ewes, which were sired by an
inferior or scrub ram. Furthermore
lambs sired by the superior ram sold
for 60 per cent more per 100 pounds
than by the inferior ram.

CHECK FOR RUNAWAY HORSES

Blinders So Hinged and Controlled as
to Make It Possible for Driver
to Stop Animal.

The blinders on this device are so
hinged and controlled by a checking
device as to make it possible for the
driver to control the horse, if it starts
to run, writes C. J. Lynde in Farmers

Checking Device for Runaways.

Mail and Breeze, by depriving it of
its straight ahead vision, or to stop
it in the same way, in the absence of
the driver, by arranging the checking
device so it will be pulled by the turn
of the wheel.

SWEET CLOVER FOR PASTURE

No Other Leguminous Crop, With Ex-
ception of Alfalfa, Furnishes as
Much Good Feed.

With the exception of alfalfa on
fertile soils, no other leguminous crop
will furnish as much nutritious pas-
ture from early spring until late
fall as sweet clover, when it is properly
handled. Live stock thrive on it.
Animals which have never been fed
sweet clover may refuse to eat it at
first, but this distaste can be over-
come by turning them on the pasture
as soon as the plants start growth.
There is practically no danger from
bloat from sweet clover, according to
Farmers' Bulletin 820, "Sweet Clover;
Utilization," which has just been is-
sued by the United States department
of agriculture.

HOGS NEED SUCCULENT FEED

Pumpkins Are Excellent for Swine Be-
cause Seeds Are Especially Good
Worm Exterminators.

Pumpkins make good hog feed.
Hogs need a little succulence of some
kind to keep them in good condition
and help them make the best use of
grains. Pumpkins are especially good
for hogs because the seeds are excel-

NO HIGH COST OF LIVING

Practically Everything Necessary
Grows Wild and in Abundance in
Amazon Basin.

One of the most interesting ex-
plorations of modern times is that
which the University of Pennsylv-
ania has conducted in the Amazon
basin. Many of the wild tribes in
that unknown jungle region were
visited by white men for the first
time when the expedition reached
their villages. Nearly all of them
treated the scientists hospitably,
many of them erecting special huts
and offering all possible aid and in-
formation.

These Indians of the South Amer-
ican interior are now for the most
part in the same condition as the
North American Indians were dur-
ing the early Spanish exploration of
this country—that is, they have not
yet been corrupted or diseased by
contact with civilization. Most of
them are remarkably healthy and
well developed. They live largely by
hunting, fishing and gathering the
fruits of the jungle. Most of them
cultivate nothing but cassava, which
is a staple food among them. The
development of agriculture is
checked by the fact that almost all
materials grow wild in abundance.

There is even a species of wild cot-
ton which the women gather and
spin. Houses are built of poles
thatched with palm leaves. Many of
the Indians sleep in hammocks
woven of plant fiber. Their way of
life is surprisingly cleanly and sani-
tary. Indians of the Parikutu tribe,
for example, bathe several times a
day, using bamboo scrapers in lieu
of Turkish towels.

VERY PROBABLE

"I understand Count De Bum
Bum met and won his bride through
settlement work."
"Yes, her father settled a million
dollars on him."

DOGS SCENT AIR RAIDS.

A curious feature of the recent
air raids over England has been the
rapid detection by dogs of the pres-
ence of hostile aircraft. Bomb-
dropping at a distance of three or
four miles always causes the dogs
to bark, and it is only on these oc-
casions that the large number of
dogs kept in the neighborhood is
realized, for the chorus of resentful
barks is remarkable. It has been
noticed that bomb-practice, gun-
practice and the hum of British
planes much nearer home do not
disturb dogs to any extent, and it
appears certain that the animals un-
derstand that there is danger about,
even when it is not in the immedi-
ate vicinity.

THINKING BASEBALL.

Boy (speaking piece at school)—
Half a league—half a league—half
a league—er—er—there's no use go-
ing on with only half a league,
ma'am, it wouldn't make the game
worth while.

A SURE WAY.

"Old Millyuns can't please his
young wife any way he tries, and yet
he lives only for her."

GETS CASH EITHER WAY.

"There goes a young fellow of
much promise."
"Now, I would call him a man of
touching personality."

TACTFUL DISBELIEF.

She—Do you really believe in
charms?
He—Not so much as in the witch-
es who use them.

USUAL PROCESS.

"Pop, what does it mean when
they say bills are laid on the table?"

BILLION DOLLARS LOST

One-half of the manure pro-
duced in the United States is
not saved for fertilizer, accord-
ing to a statement of Carl Vroo-
man, assistant secretary of agri-
culture. When this loss is fig-
ured on the same price basis as
commercial fertilizing materials
it amounts to approximately one
billion dollars annually.

SUITABLE AS A CLOD CRUSHER

Not Only Does Machine Perform Duty
for Which It Was Intended, But
Also Cuts Scrubs.

This is a machine, a simple one at
that, that will perform double duty for
the farmer. Not only does it crush the
clods, a purpose for which it original-
ly was invented, but the inventor has
attached a scrub-cutting device, so
that the two operations are simultane-
ous. Also the rear half of the cutter

Clod Crusher.

can be folded up and latched on top
of the crusher so that only the latter
is working where there is no scrub to
be cut. The cutting operation is per-
formed by a number of scraper knives
attached to the sides and rear of the
framework, so that no naughty scrub
escapes.—Farming Business.

TO PRODUCE INFERTILE EGGS

Formerly Farmer Was Not Paid for
Trouble, but Now Merchants
Have Learned Value.

It pays to produce infertile eggs.
Many merchants are now paying an
extra price for these eggs, according
to Ross M. Sherwood of the depart-
ment of poultry husbandry in the Kan-
sas State Agricultural college.

Two classes of merchants buy eggs
from the farmers. One pays a slight
increase in price for infertile eggs
and the other pays the same price for
both fertile and infertile eggs. The
swat-the-rooster movement made it
possible for the farmer to market in-
fertile eggs.

Formerly the farmer was not paid
for his trouble in producing infertile
eggs as the merchants did not know
the value of the infertile eggs for mar-
ket purposes, pointed out Mr. Sher-
wood. Recently, however, it has been
brought to the attention of the mer-
chant, that he can afford to pay a
premium for infertile eggs because
they will keep much better. He will
be able to ship his eggs to a good mar-
ket with the assurance that they will
grade as first and seconds, instead of
rots when they reach their destina-
tion.

SUPPLY FEED ANIMALS LIKE

To Obtain Best Results It Is Best to
Cater to Beast's Appetite—Watch
Them Closely.

Animals are much like human be-
ings in that they have their own in-
dividual preference for certain foods.
While this preference is formed by
habit, to get the best results with the
feeds, it is best generally to cater to
the animal's appetite.

Some horses will not do well without
oats in the ration. Others do not es-
pecially care for oats, but require corn,
some require more hay than others,
some must have ground feeds. To get
the best results such animals should be
humored.

Our problem in feeding is to watch
the animals and see that they get the
feeds they require and no more. Feed
left in the trough or scattered on the
ground out of reach of animals does
not produce.

Even in feeding cattle a skillful feed-
er will soon learn the different ani-
mal's peculiarities and meet their re-
quirements in such a way as to get
economical gains. If he does not watch
closely he is likely to waste feed while
some of the animals are not getting
enough.

ACTIVITY IS LIFE OF FOWLS

Best Results Obtained by Feeding
Sparingly in Morning and Heavily
in the Evening.

A very common practice with many
flocks is to feed the same quantity of
scratch feed both morning and evening.
Better results have been obtained by
feeding quite sparingly in the morn-
ing and heavily at night. A hen likes
to scratch and work for her food.
Don't make it too easy for her. Re-
member activity is the life of the hen.

USE FOR UNTILLABLE LANDS

Rough Spots Often Can Be Made
Profitable as Pastures—Use Other
Parts of Farm, Too.

There are often to be found on
farms of any extent rough, untillable
lands that cannot be used to advan-
tage in crop production and that could
be used profitably for grazing pur-
poses, but the idea that this

SOUND WAVES LOCATE GUNS

Sixty-Three Big Fieldpieces Destroyed by This Means—Many Other Destructive Instruments.

Hats off to the scientists! If they are chargeable with inventing the destructive instruments of war, so also they propose to construct others that will undo the evil. Dr. Joseph S. Ames, professor of physics at Johns Hopkins university, who has just returned from the front, has described a few of the new inventions, says Leslie's Weekly.

The location of big guns is now made by apparatus that records sound waves. In the battle of Messines, Professor Ames says, 63 guns of large caliber were located and destroyed by this means. Wireless telegraphy in connection with air-planes and the construction of the planes themselves have passed far beyond anything conceived in this country. Methods not described, for obvious reasons, are being continually advanced for locating mines and detecting undersea craft. New optical instruments have been devised for observation purposes. Map-making has undergone enormous changes in connection with the war studies. Additional applications of the science of meteorology have been found possible in offensive attacks by land and flights by air.

Especially mention is made of the work of Doctor Burgess of the United States bureau of standards, whose studies of metallurgy and steel alloys are now being utilized in the steel produced in American mills.

A Princeton professor has made a special investigation of offensive and defensive gas warfare. The importance of this feature is emphasized by the statement that 20 per cent of the shells now used by the Germans contain lethal gases.

RIGHT IN IT

The Farmer—My boy Hiram gets a good deal o' fun out of automobilin'.

The Visitor—But he doesn't own a machine.

The Farmer—Of course not. He's one o' the county constables.

NO STAMPEDE WANTED.

"Curious, the government doesn't want married men to go to war. Who's better seasoned or more anxious to change the scene of battle?"

"That's it; the government wants 1,000,000 men, not a stampede."

A QUESTION.

"Say, ma."

"What?"

"If ears were supposed to be kept clean why weren't they made flat, like your face is, so you could do it easily?"

FINE ETHICAL POINT.

Old Lady—My goodness, that parrot swears something awful!

Dealer—Why, lady, in parrot language they ain't swear words at all!—Puck.

IT DOES MAKE A DIFFERENCE.

"I can't see for the life of me why he married her."

"Now that he's married, neither can he."

HE'D HEARD SO.

Actor—There is such a thing as eating too much.

Poet—So I have heard. I wonder what it is like?

WANTED SOMETHING LEFT.

Barber—Will you have anything on your face, sir?

Customer—You might leave my nose if you don't mind.

ECONOMICAL.

"Is this an economical car?"

"Very. The cost of running it is so low that what you save in pew-

HIS GREAT SPEECH

By ELIAS KILLIAN

"Is this the Woodbrook accommodation?"

He was tall, muscular and in a desperate hurry. It was an accommodation train he was after, but he spoke in limited express time.

"Time's up," was the reply, and the man began to close the gate. He began to close it—but that was all. An arm like steel grasped the iron and, pushing back both gate and keeper, made a path and the young man did not tarry to hear the unpleasant words the gatekeeper said, but started in a full run down the platform. The train was beginning to move, but with a fine jump he caught the rail and then in continuance of his haste he threw himself against the door and moved quickly and intently down the aisles of the cars, going from one to the other in feverish intensity. It was the first train after the fashionable hours of business and society—the twilight train that carries people who have and who make money to their suburban homes.

He met the conductor. "Captain," he said very rapidly, "is Miss Martingham of Woodbrook on this train?" and before the conductor could reply the young man had darted forward and was standing by an old lady whose generous lap was as full of bundles as a Friday bargain counter—it happened to be Friday, too. In the same seat next to the window sat a beautiful and placid young woman.

"Why, how do you do, Mr. Faraday?"

He took off his hat, but his speech was all directed to the elderly lady with the numerous spoils of shopping. "Madam," he said, "I'm very sorry to disturb you—very sorry—but I have something of extreme importance to say to this lady, and I must have the seat you are occupying."

"Sir?"

"Allow me to move your bundles to the seat opposite. Thank you much for your kindness. Just give them to me. That's it. Thank you! Be quick, please, as I must get off at the station after the next one."

"Sir?"

Before the bewildered matron could know what had happened she found herself escorted—driven—to the other seat and the bundles were falling back into her lap in heaps, and in the midst of it all the largest one broke and oranges rolled wildly forth. Then the young man dived after them. He could hardly do less—and it was a lot more than he wanted to do. In a few minutes he had the fruit, and, with more apologies, he jumped around, and took the seat beside the young lady.

"Don't laugh," he said. "Don't speak. Just listen," and with deadly seriousness he went on. "I'm expected to make the principal speech at tonight's meeting. Must get off station after next so as to get back in time. Ten minutes ago I found that Dick Thompson is going out to your house tonight, and I know he is going to propose. Now all I ask is a fair show—just—"

"Well, Mr. Faraday, what do you want?" and the blue eyes danced.

"Miss Martingham—Nellie—it's just this way. All I ask is that you hold out until I can have my say. If I know that I'm to have equal chances with Dick—it's downright mean of him to take advantage of me when he knows I must make that speech—oh, yes, we've been good friends and all that sort of thing—but it's just this way—why don't you see I can never—"

"Really, Mr. Faraday, I have not the slightest idea that Mr. Thompson—"

"I didn't say that you had, but I have, and I know what I am talking about. Now, Nellie, don't throw a fellow down. Hold your heart back for twenty-four hours. That's it—that's what I'm coming to."

"Next station Dover," sang out the brakeman.

"Give me your answer. I think I hear it now. Will you ruin that speech?" he asked. "Or will you give me hope—something to build on and work for? If so, when I am before that great audience, I can see your smile and feel your interest, I know I shall do something that is worthy—but if it's all up, then—"

"I beg your pardon," said the conductor as he stopped at the seat. "Did I give you the right change?"

"Too much?"

"No, too little."

"Then keep it and let me alone." Go away—please go away."

"All out for Dover," sang the brakeman.

"Nellie," he whispered, "stop laughing and tell me whether or not that speech is going to be a failure or a success—tell me enough to keep me from—"

"Dover—all off," sang the voice, and Faraday arose.

"Tell me," he asked.

"I am sure your speech will be a great success and I shall be glad to have you tell me all about it tomorrow night," she said very sweetly.

"God bless you," he exclaimed, as he ran down the aisle.

Optimistic Thought.

While the surest prospect in life is death, good men enjoy contemplation of future happiness.

Claiming that it holds fish more securely than the usual type of hook, a Norwegian has patented a fish hook with the barb at one side of instead inside the point.

Master Mind Clairvoyant And YOGI MEDIATOR PROF. MARTIN

Now located in Hopkinsville and will give his regular \$2.00 reading and consultation for the LOW FEE of 50 cts to all who bring this announcement within the next seven days.

Prof. Martin tells the object of your visit, WHEN AND WHOM YOU WILL MARRY, and exactly what you want to know, or he will make NO CHARGE.

Oldest, Truest, Longest Established, Best Known, Most Popular Clairvoyant in America. Confidential and Reliable, Absolutely the Very Best One to Consult.

If you have experimented, have tried this or that one without result, don't give up, but come today, now, this very hour, and see Prof. Martin, a natural born medium and clairvoyant.

MARTIN'S WORK SPEAKS FOR ITSELF

Men and women of mature years, professors and doctors of science have stood amazed and dumbfounded at his remarkable talents. This medium does not paint a picture of roses and sunshine for you when trouble and darkness is really about you; he does not gladden your ear for the sake of a fee. He looks far away across the dark chasm which separates the human body from the fitting soul and to that which is to be told, and straight from the shoulder you get the truth just as he sees it.

Prof. Martin tells in what condition your business is and how to improve it, tells you all about your wife, husband, sweetheart or lover and how to win the love of any one you desire; tells you of any move, journey, speculation, position or change of any kind which may be before you and what to do to obtain the best results; tells you exactly what your acquaintances think of you, who to trust and who to shun. He'll tell you whom and when you will marry, if at all, and give the name, age, occupation and disposition. In short, you'll learn everything you called to find out.

UNHAPPY PEOPLE

How many unhappy people are there whose lives are darkened by the acts of others? Is your life nearly a wreck because you have trouble of a domestic nature or otherwise? Do you desire a return of affection rightly yours which another receives? Do you wish to marry the one you love? Is there a coldness growing, a separation, a rival, or interference of some one? If so, call on Prof. Martin. He will prove that you can obtain your desire.

Prof. Martin's clairvoyant and palmistry readings are accurate, and tell for what you are especially adapted; your talents, temperaments, characteristics; things you want to know concerning health, happiness, success, failure, length of life—everything.

Intelligent and high class patronage earnestly requested—those capable of appreciating a fine reader—a genius.

Keep Hands Off Wounds.

A wound should never be touched with the bare hands. It is better to cover it up just as it is rather than to run the risk of introducing another colony of perhaps even more dangerous germs. If possible, however, the wound should be washed out with an antiseptic solution. If water is to be used, it should have been boiled at least ten minutes, as simply bringing it to the boiling point will not kill the germs.

Let Us Strip Your Tobacco

We have lots of room for stripping tobacco and have a man in charge of the strippers at all times. It has been reported that Mr. Butler wouldn't be here, but this is a mistake. He will be in active charge of every sale. Bring us your tobacco and we will see that you get the highest market prices.

Corner 10th & Campbell, Near L. & N. Depot.

U. S. Agent to Direct German-Owned Concerns

German owned properties in the United States will hereafter be controlled by the federal government, millions—perhaps billions—of dollars' worth of property coming under the supervision of those charged with this extraordinary task. A Mitchell Palmer, former representative from Pennsylvania, has been appointed by President Wilson to take charge of enemy alien properties during the remainder of the war. The plan is to supersede German directors with men appointed by the American government. All earnings will be held in trust by Mr. Palmer's organization. A complete record will be kept and a final accounting made after the close of the war.

Six Questions.

Are the roads in your county a credit to you, or are you ashamed of them?

Are the roads in your county wide enough for the convenient passage of cars?

Are the roads in your county marked so that the tourists from distant states have no difficulty keeping to the right road?

Are the roads in your county all-year-round roads, or only good weather roads?

Are the roads in your county such that the tourists traveling over them want to come back that way.

Are the roads in your county good enough for the transportation of military troops, with accompanying supply, ammunition and engineer trains? You can never tell when your roads will be needed for this very service. Military trucks are heavy.

LaFollette's Bluff.

The Democrat Printing Company of Madison, Wis., of which O. D. Brandenburg is the editor, has been sued for \$100,000 damages by Senator LaFollette. The action is based on alleged libels contained in editorial utterances, news dispatches, quotations from other newspapers and magazines, and condemnatory resolutions published in the Democrat and intended to show that the Senator was giving his aid and comfort to the enemy. Mr. Brandenburg says he welcomes the chance to prove all of the statements his paper has made are true.

What You Should Do At Twenty-one.

Dr. Frank Crane, the famous editorial writer, has written an article for the December American Magazine which is called "If I Were Twenty-one." Here are ten things he says he would do if he were twenty-one. He says:

1. I would 'Do the Next Thing.'
2. I would Adjust Myself.
3. I would Take Care of My Body.
4. I would Train My Mind.
5. I would Be Happy.
6. I would Get Married.
7. I would Save Money.
8. I would Study the Art of Pleasing.
9. I would Determine That I Would Be a Thoroughbred.
10. I would Make Some Permanent, Amicable Arrangement With My Conscience.

Michael, First of Archangels.

Michael, the first of the archangels (Daniel 10:13, Jude 9.) is described in Daniel 10:21, as "the prince of Israel," and in 13:1, as "the great prince which standeth" in time of conflict "for the children of thy people."

BAD BLAZE NEAR MIDNIGHT

Storehouse Belonging to W. L. Mitchell is Partially Destroyed by Fire.

Fire of unknown origin practically destroyed the storehouse on West 19th st. near High, owned by Mr. Mitchell, about 12:30 o'clock yesterday morning. The building was worth probably \$1,000 or \$1,200. Mr. Mitchell had \$700 insurance.

When you want fire, tornado, life or bond insurance in the Oldest Strongest Companies see H. D. WALLACE office up stairs, over Anderson-Fowler Drug Store, Corner Ninth and Main.
